

Name: **Microtek Organics** Sample: **Plant and Soil Food/Nourish** Analysis no.: **3367-1-MWSL** Date: **22/08/2022**

**Customer name** Microtek Organics **Date received** 22/08/2022  
**Client name** Alex Girke **Agent** Microbiology Laboratories A  
**Sample name** Plant and Soil Food/Nourish **Advisor**  
**Product type** Not Specified **Authorised by**  
**Date sampled** 22/08/2022 **Ext. ID** **Analysis no.** 3367-1-MWSL

## Key Microbe Groups

Group	Biomass (mg/L)	
	Yours	
<b>Total microorganisms</b>	<b>0.5</b>	
<b>Total bacteria</b>	<b>0.1</b>	
<b>Total fungi</b>	<b>0.3</b>	
<b>Bacteria</b>		
Pseudomonas	<b>0.022</b>	
Actinomycetes	<b>0.008</b>	
Gram positive	<b>0.066</b>	
Gram negative	<b>0.080</b>	
Methane oxidisers	<b>0.000</b>	
Sulphur reducers	<b>0.000</b>	
True anaerobes	<b>0.000</b>	
<b>Eukaryotes</b>		
Protozoa	<b>0.065</b>	
Mycorrhizal fungi (including VAM)	<b>0.042</b>	

Useful indicators	Yours	
<b>Microbial diversity</b>	<b>24.8</b>	
<b>Fungi : Bacteria</b>	<b>2.1</b>	
<b>Bacterial stress</b>	<b>0.4</b>	

**Key** \*BDL = Below Detectable Limit (0.001 mg/kg)

### Comments

Most microbial groups were present and Microbial diversity was good. True anaerobes were not present, which indicates non anaerobic conditions during manufacture or storage. Sulphur reducing bacteria were not present, which could not affect product chemistry, pH, smell and appearance over time. Bacterial stress was a little elevated, which could be due to food scarcity, pH or other edaphic factors present in the liquid.

### Explanations

Microbe Wise for Liquids measures the living biomass of a number of important microbial groups directly from your sample. It uses molecular ('DNA type') technology to analyse the unique cell membrane 'fingerprint' of each microbe type to identify and quantify well-known microbial groups essential to important environmental processes, such as in soil, compost, water and other media. The Microbe Wise method allows for some unique features, such as a measure of microbial diversity and other useful indicators. Results are presented in a way that allows you to easily assess the microbial status of your sample in detail. Visit [www.microbelabs.com.au](http://www.microbelabs.com.au) for more information.
