

This plant-derived formula, packed with 18 essential plant based amino acids, delivers organic nitrogen that is readily absorbed by leaves, driving a significant boost in crop yield. Its unique blend not only enhances the crude protein content in food crop grains but also improves the overall quality of your harvest.

In addition, it boosts the soluble sugar and protein levels in green leafy vegetables, elevating their nutritional value and taste. Filtered to 130 micron this versatile liquid can be applied through various methods, making it compatible with any irrigation or fertigation setup. It's a reliable companion for your garden, ensuring healthier, more vibrant crops.

Enhance plant resilience to environmental stressors and diseases, boosts organic nitrogen in the soil to stimulate growth and improve yield quality, promotes healthy root regeneration, enhances soil structure and buffering capacity, regulates pH, maximises fertiliser effectiveness by reducing nutrient leaching, and provides essential amino acids to support efficient photosynthesis. All this in just one product, Amino Mate, your plants best mate.

Industry	Dilution Rate	Timing
Broad-acre	1-3L /Ha	Prior to flowering
Vines & Orchards	3-5L /Ha	Growing and Pre-flowering
Hydroponics	2-8mL / L	Growing cycle
Vegetables	3-5L /Ha	Growing cycle
Home Garden	5-20mL / L	As required
Stress Recovery	2-5L /Ha	As required

**AVAILABLE SIZES: 1L | 2L | 5L | 20L | 200L | 1000L**
