

STRENGTHEN | KELP CAL

Introducing our game-changing "Strengthen / Kelp Cal" formula—where the power of nature meets the innovation of science to give your plants the ultimate boost they deserve. Enriched with our signature worm extract, a blend of three seaweeds and kelps, and fortified with organic calcium, this formula delivers a potent blend of plant nutrition and vitality.

Calcium is essential for plant growth, supporting cell wall structure, nutrient uptake, and overall resilience. Without enough calcium, plants may suffer from issues like blossom end rot in tomatoes or stunted growth in leafy greens. By adding Strengthen / Kelp Cal to your plant care routine, you're not just offering a nutrient boost; you're building the foundation for strong stems, vibrant leaves, and abundant fruiting.

At Microtek Organics, we're not just about selling organic solutions; we're on a mission to cultivate a greener, healthier planet through sustainable practices and premium products. With Strengthen / Kelp Cal, your plants aren't just receiving nutrients – they're getting a full-body workout for their roots and leaves, ensuring they grow strong, healthy, and resilient against environmental challenges.
